

## Create an Organic Garden

Organic Gardening means growing in harmony with the environment without resorting to chemical fertiliser and pest controls. Even if you don't go completely organic, its helpful to try and introduce comes organic principles into your gardening.

1. **Start by improving your soil by mixing in plenty of compost** and other bulky organic matter.
2. **Feed plants with naturally derived fertilisers such as *Dynamic Lifter Organic Plant Food* or *Nature's way Fish Emulsion*.**
3. **Create no-dig garden beds** by building layers of hay, compost or other bulky material above the natural soil level.
4. **Enrich your garden** with with sprinklings of animal manure such as ***Nature's Way Sheep Pellets*.**
5. **Use organically grown seed** in the vegetable patch such as ***Yates Organic Seed Range*.**
6. **Use a natural growth stimulant** on your seedlings such as ***Dynamic Lifter Seaweed Tonic*.**
7. **Plant bird-attracting shrubs** to encourage natural insect-eaters into the garden. Hand remove pests as soon as they appear .
8. **Hand remove pests as soon as they appear**, before numbers reach damaging proportions.
9. **Choose natural pest controls such as *Yates Success of Lime Sulphur*.**
